

CAREER OBJECTIVE

I have more than 15 years of professional experience in computer science. Initially, I was engaged in programming in the field of information security, which allowed me to gain a good understanding of operating systems. In the second phase of my professional career, I spent years learning and developing web technologies. During the third phase of my professional life, I actively worked as a Linux expert, and my latest position was as a Linux admin at Saman Bank.

Years of experience: 15 years

Age: 33 years old

Marital status: Single

Military Service: Medical Exempt

Current Location: Iran, Tehran

WORK EXPERIENCE

mindology.io Startup Founder. 4 yrs - 2019 -2024

mindology is a groundbreaking interdisciplinary psychology platform designed to revolutionize the way counseling sessions are conducted, leading to maximize improvement for clients.

My Role: Founder and Product Designer - Technical Infrastructure Lead

Technical Expertise: OpenStack- Linux OS (CentOS, Ubuntu) - Web Servers (Nginx, Apache2) - Apache Tomcat - MySQL Database - Cloud Storage - HA & Replication - Gitea - Docker - Zabbix - jitsi meet – Ansible – Docker - BashScript

Natanz Steel Complex ICT Consultant. 4 mos - 2023

NSC is the largest private steel mill in the Middle East. I was responsible for overseeing the redesign and implementation of the factory's network infrastructure and server rooms.

Technologies used: HP servers - Microtick - Cisco - Microsoft OS - Storage solutions - VMware vSphere

Saman Bank Linux System Administrator. 6 mos - 2019

After two years working at a subsidiary of Saman Bank, due to management decisions, the IT infrastructure support team was transferred to the head office of Saman Bank's IT unit. I continued to handle my previous responsibilities, which included **Senior Linux Administrator:** Managed, troubleshooted, optimized, and secured Linux servers.

Linux Hardening: Secured Linux systems according to industry-standard security checklists like OWASP.

DevOps: Automated build processes using GitLab.

OS Migration: Migrated from CentOS 6 to CentOS 8.

Pardazeshgaran Saman Linux System Administrator. 2 yrs - 2017-2019

OS migration: Successfully led OS migration projects from CentOS 5/6 to CentOS 7 in a live operational environment.

OS Expertise: Red Hat, Oracle Linux, HP-UX, and Debian, facilitating efficient troubleshooting and system optimization.

Zabbix Monitoring Implementation: Implemented Zabbix monitoring for Saman Bank's applications, including OS (HP-UX, Oracle Linux, CentOS, Windows), Oracle database, web services, and log files, enhancing performance and identifying issues proactively.

TI 2 to FBTI 2.7 Migration: Managed the migration of TI 2 to FBTI 2.7, ensuring a seamless and successful transition to the new platform.

SAP HANA Experience: Worked with SAP HANA, contributing to the implementation and support of SAP projects.

EDUCATION

Center of Tehran Municipality ICT Organization Associate -Engineering (Computer/Hardware and Software) 2019 - Dropout of university

Islamic Azad University East Tehran Branch Associate –Engineering 2009 - 2011 electronic field - Dropout of university

TECHNOLOGY SKILLS

Startup

Launched several startups, demonstrating expertise in ideation, execution, and collaboration in fast-paced environments.

WEB\CMS \IT

Proficient in JOOMLA, WordPress, and myBB, with experience in website development, troubleshooting, and maintenance.

Linux Administration

Expertise in managing and optimizing Linux environments in fast-paced and demanding environments, including Linux-based services

Windows Server Administration

Experience with Windows Server 2008, 2012, and 2018. Managing common Microsoft services: AD – IIS – File Server – DNS

DataBase

MySQL, MariaDB, MongoDB and HANA

Message Queues

RabbitMQ, ZeroMQ, IBM MQ

OS Script Bash\PowerShell

Proficient in Bash\PS scripting for system administration, automation, and development tasks.

Zabbix Monitoring

Design, implement, and maintain comprehensive Zabbix monitoring solutions for servers, application, operating systems, services, and networks.

Security

Web & Software Security Concepts (bug identification & prevention) fundamental knowledge of Reverse Engineering and Analyzing Infected Windows Systems Windows Malware Development.

Cloud Computing

I bring a diverse cloud computing skillset, encompassing Azure, AWS, and OpenStack, enabling me to design, implement, and manage cloud solutions across various platforms.

Programming Language

vb6 – php5 – java se – Dart\flutter – JavaScript – html\css

Methodology:

Agile/Scrum environment
